

Debugging Techniques used

1. Using the test case results of appendix 1 (Pass/Fail), clearly specify the type of debugging techniques used by you to correct the errors in following format.

- **List only those test cases which have “failed” status**

Test case id	Test case for xyz components	Debugging Technique*

*** Types of debugging techniques (refer to wikipedia for more insight about the listed techniques)**

1. Print (or tracing) debugging
2. Remote debugging
3. Backtracking
4. Post-mortem debugging
5. Delta Debugging
6. etc...etc..

2. After correcting faults re-run the test cases and provide results.

- **Refer to appendix 1 for test case template**
